**"One way or another, someone is lying to women."**

The documentary "Hush" looks at the subject of abortion from the perspective of women's health. It was produced by feminist pro-choice Indo-Canadian director Punam Kunah Gill.

This film provides full disclosure - despite the provincial healthcare's utter silence surrounding possible adverse effects - about the long-term physical and emotional impact of deliberately terminating one's pregnancy.

### 2017 Upcoming Event

**Bowl-a-thon**

**PLEASE JOIN US!**

at Kingsway Bowling Alley  
in Welland. Saturday

November 4, 2017

@ 4 pm \$35.00 entry fee

Register Before October 27, 2017

Forms in the office or online

Welland-Port Colborne Pro-Life Association is an educational group. Our primary purpose is to educate our local Community about pro-life issues from conception to natural death. We also provide a pro-life presence in the community, and, when required, provide support to women in crisis pregnancies.

President Annette Loeffen  
Treasurer Terry Dyson  
Community Liaison Muriel Dyson  
Secretary Becky Lee  
Membership Director Lisa Loeffen  
Youth Coordinator Angela Braun  
Director Mary Maslink  
Director Dave Harrison  
Member at Large Shirley Brooks  
Editor - Layout  
& Website Henk van der Wilt

Did you know that post-abortion women are at significantly greater risk for breast cancer, pre-mature births, sterility and fertility problems?

Many women are unaware of all these facts - it's even more shocking to realize this information is routinely withheld from women.

This documentary does not display graphic images, but younger children may find medical reporting and statistics a little boring.

Welland Port Colborne ProLife will be showing this film Thursday, October 26th in St. Andrew the Apostle Church Hall at 6:30 pm.

*In "Pro-Life" circles, hearing about the negative effects of abortion is a common thing. Churches and Crisis Pregnancy Centres will tell you about the psychological trauma, potential for physical damage, and even breast cancer, that abortion may cause.*

*On the other hand, in "Pro-Choice" circles, and at abortion clinics it is commonly told that the procedure is much safer than childbirth, that the psychological effects are the same as if you deliver the child, and the breast cancer connection is a closed case.*

*One way or another, someone is lying to women.*

**Join us in a Welland - Port Colborne Pro-Life Exclusive showing of the Documentary Movie "HUSH"**  
**Thursday October 26, 2017 6:30pm @ St. Andrew the Apostle RC Church.**

## ***Pro-Life organizations are always working ....Letter to the Editor National Post***

On July 27,2017 the National Post published an article about scientists editing genes of Human Embryos.

Read it here: <http://nationalpost.com/pmn/life-pmn/oregon-scientists-do-first-human-gene-embryo-editing-in-us>

The president of the Alliance for Life Ontario rs. Jakki Jeffs replied to the editor in the following fashion.

Dear Editor,

In his book *Nazi Doctors-Medical Killing and the Psychology of Genocide*, Robert Jay Lifton commented that " Psychologically speaking nothing is darker or more menacing, or harder to accept, than the participation of physicians in mass murder." he also noted that, in part, his book bore "witness to the fact that doctors killed and did so in the name of healing.."

In the article "Scientists 'edit' genes of human embryos which ran yesterday we learn that the tiniest members of our human family have been sliced and spliced in what was described as "an exercise in science" to "someday help babies avoid inherited diseases". The fact, that these tiny human beings were never going to be allowed to live and grow apparently, makes this barbarism, ethical.

In 1916 Vikenty Verassayev M.D said, "The moment has arrived for society to take its own measure of self-protection against those zealots of science who have ceased to distinguish between their brothers and guinea pigs."

I would note that Guinea pigs probably have more rights than unborn children currently in Canada! The 4,000,000 unborn Canadians killed by physicians for so-called health reasons since 1969 bear witness. Physicians killing! Menacing doesn't get anywhere near the horror.

Respectfully submitted by Jakki Jeffs - Alliance ofr Life Ontario

## **June 1st Coffee House St. Catharines**

*This picture is William Mathis, president of St. Catharines RTL, Joseph VanRuyven, MC for the evening event, and in front, Sister John Mary & Polly Corso, speakers for the Coffeeshouse event.*

*Sister John Mary on the left, Polly Corso and Sister Claudia on the right*

*These are pictures from St. Catharines Coffeeshouse event June 1 at St. John Ukrainian Catholic Church Hall - speakers were Polly Corso, who spoke on "A Nurse's Experience Caring for Post-Abortive Women" and Sister John Mary from Sisters of Life in Toronto, whose mission it is to build a Culture of Life, caring for women in crisis pregnancy*

*Becky Lee, Muriel Dyson, Monique Shinton, and Barb Nananovich who attended the event*

## by Annette Loeffen

*Building a Culture of Life one heart at a time is the mission of the youthful and vibrant Sisters of Life in Toronto. Sisters Claudia and Jean Mary spoke about their life-affirming work on June 1 at St. John Ukrainian Catholic Church, sponsored by St. Catharines RTL.*

*They have served over 800 girls in just over 10 years. Their motto is one day at a time helping a child. The dedicated sisters offer prayerful and practical support to young women in crisis pregnancies - their response to the Culture of Death prevalent in our society. They are influenced by Our Lady of Guadalupe, who represents the new evangelization, her maternal love, restoring the sanctity of Life. The Sisters live a contemplative apostolic life, the Eucharist their foundation, which focuses their mission of helping those who are vulnerable to abortion.*

*They offer both adult and co-ed retreats, pregnancy assistance and post-abortion healing, as well as emotional support to help the young women choose life.*

*The Sisters are partnered with co-workers of Life - prayer guardians who provide rides to medical appointments for the young ladies and to be a friend. CWL groups donate carriages, cribs, immigration lawyers, places to live. "God provides whatever the need."*

*To assist or donate, or learn more: [www.sistersoflife.org](http://www.sistersoflife.org), or call 1-877-543-3380*

## ABORTION REVERSAL PILL

## by Annette Loeffen

*On Saturday, June 17th, Alliance for Life Ontario held their annual Conference. Very exciting news was relayed by one of the featured speakers, Dr. Matthew P. Harrison, MD. He is the Associate Medical Director at the Culture of Life Family Services, a Catholic family healthcare clinic and crisis pregnancy center in San Diego, California. He and the Medical Director, Dr. George Delgado, have had significant success in reversing the effects of RU486 (Mifepristone), otherwise known as the abortion pill - which was approved in Canada July 2015, under the trade name, Mifegymiso.*

*(As a matter of interest, Finish studies conducted on 42,619 abortions reported 4 x more adverse effects re chemical abortions than surgical)*

*Dr. Harrison provided details of their medical protocol that Dr. Delgado had published in The Annals of Pharmacotherapy in December 2012. Statistics from May 2012 - June 2017 showed a success rate of 60-70%. Their studies indicated that 750 women used their protocol consistently in attempting to reverse the abortion process - 300 babies were born.*

*The success of this procedure depends on timing - it must be done within 72 hours after taking the first mifepristone, and before taking the second dose. So there is hope for young women who change their minds.*

*Currently there is a network of 80 pro-life doctors in 22 States who are able to perform the abortion reversals. In Canada, APR (abortion pill reversal) providers are in Toronto, Edmonton and Calgary. Dr. Harrison will provide pill reversal Kits FREE to medical personnel interested in this process to help women who regret their decision to abort their child.*

*Contact: [AbortionPillReversal.com](http://AbortionPillReversal.com) or call 1-877-558-0333.*

*Anyone who has taken that first pill and then changed her mind can go online to: [www.abortionpillreversal.com](http://www.abortionpillreversal.com) or call the toll free hotline above.*

**Visit [www.wpcprolife.com](http://www.wpcprolife.com)  
To read the brochure  
on the Abortion Pill**

*Drs. Harrison and Delgado are providing REAL CHOICES to those who want and need them.*
